## GENERAL AFFIDAVIT

State of Indiana  
County of Indiana

On September 12, 2006 and December 5, 6, 7, and 13, 2006, Indiana Department of Environmental (IDEM) staff collected ground water samples from private residential and business wells. In the Lusher Street Ground Water Plume area. The wells sampled are currently being used for drinking water and are the only source of drinking water. Staff noted on field sheets the number of residents or workers that would consume the drinking water at that location.
